## Q&A:

Q: The button doesn't respond and light doesn't light up?

A: Check the cable is it connect to the right way or it's loose, After this it's still can't work,normally it's the battery dead. It needs to change the batteries (4\*1.5V AAA battery), or pull out the inner back cover and insert it again.

Q: Which model of the door can install the fingerprint door lock?

A: There is no limit. If the door thickness more than 3.5cm-6.5cm then it can install.

Q: How to restore the factory settings?

A: Long click the setting button 5s, the blue light will shinning and have the bee sound, After 5s will have the red light shinning and have a voice remainder "initial success", This means successful.

Q: What is the initial password if the fingerprint lock is restored to the factory setting?

A: Initial password is "123456"#

Q:How to do if the lock run out of the battery?

A: Use the power bank to connect the USB port to charge then use of use the key to open the door.

Q: How to do if you forget the password?

A: Use the fingerprint or key to unlocked the door and then restore the factory settings to reset the password.
